

Winter Heating System Checklist

Apex, Cary, and Holly Springs Homeowners

Use this quick-reference checklist to spot heating issues early and keep your home comfortable through the coldest part of winter.

Airflow & Filters

- ☐ Replace air filter if dirty or older than 30-60 days
- ☐ Confirm all supply and return vents are open
- ☐ Remove furniture or rugs blocking airflow

Comfort & Performance

- ☐ Home heats evenly room to room
- ☐ System reaches set temperature without strain
- ☐ Warm air flows consistently from vents

Sounds & Smells

- ☐ No rattling, banging, or buzzing sounds
- ☐ No burning or musty odors during operation
- ☐ System starts and stops smoothly

Energy Use

- ☐ Energy bills are consistent with previous winters
- ☐ No unexplained spikes in usage
- ☐ Thermostat settings remain steady

Thermostat & Controls

- ☐ The thermostat responds accurately
- ☐ Batteries replaced if needed
- ☐ Schedule avoids large temperature swings

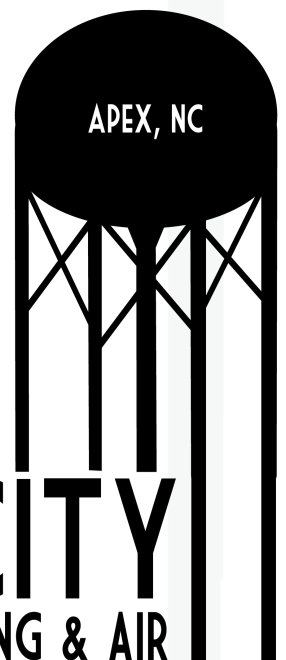

When to Call a Professional

If you checked any of the following, it may be time for service: uneven heating, rising energy bills, frequent cycling, or ongoing unusual noises.
